# Executive Health Program

# Executive Health Program

## Comprehensive health expertise for leaders

The **Executive Health Program** at SSMC provides fully tailored health care packages to meet each individual's unique needs and delivers seamless streamlined experience from evaluation to treatment. Throughout the patient's visit, a designated representative ensures minimal waiting time maximizing valuable time spent with our health care providers. As part of our exclusive program, valet parking and designated parking will be available along with premium corporate packages.

Utilizing comprehensive evidence-based practice, we provide integrated health evaluations to develop a holistic understanding of every patient's health care needs.

## Why SSMC?

SSMC's team includes European and American board-certified physicians with expertise to deliver a safe, high-quality, speciality-specific care that provides superior levels of patient satisfaction.

# Benefits

---

## Prevention

By conducting age-appropriate screening and advanced diagnostics, we facilitate prevention of diseases.

## Early Detection

Using state of the art technology, we can detect diseases early, ensuring successful health outcomes.

## Best Performance

As part of the SSMC Model of Care, our team of experts provides individualized attention and works collaboratively to deliver compassionate and trusted care for each patient.

## Services

Physician consultation

Mental health care

Cardiovascular risk assessment

Vaccination review

Laboratory tests

Diagnostic image tests

Nutrition and fitness and wellness consultation

Additional preventive testing based on gender and age

# What to expect

---

## Arrival

Executive VIP car park to provide easy access.

## Nurse Assessment

Vital signs, and body mass index calculation.

## Clinical Lab

Our in-house lab can perform a complete blood count (CBC), a comprehensive metabolic panel (CMP), a lipid panel, thyroid-stimulating hormone test, a urinalysis, Vitamin D test, vitamin B12 test, CRP, prostate-specific antigen tests (for men), and pap smear screening (for women).

## Breakfast

A healthy, nutritious breakfast to give you a morning boost.

## Consultation and Full Physical Examination

Physical examination and a comprehensive, one-on-one medical & lifestyle consultation to help understand your specific health, risks, concerns and needs.

## Final Consultation with Physician

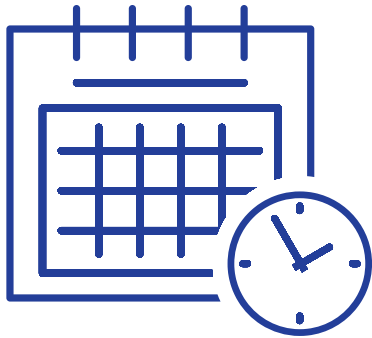

Your physician will discuss the results of your tests and implement proposed changes to lead you on the path of optimal health.

## Departure

You will leave with a health care summary. If your test results indicate the need for follow up care, our executive team will schedule your follow up appointment.
